EcoLight by IMG Lighting

EcoLight by IMG Lighting provides energy conscience households and offices with a cleaner, smarter lighting solution. EcoLight utilizes the latest generation of ultra bright, high efficiency LEDs to produce a clear, crisp, sharp light source. With high illumination and low energy consumption, EcoLight is ideally suited for the environmentally conscience household or office that requires superior lighting performance. The cost savings achieved through reduced energy usage enables EcoLight to pay for itself over its lifetime. Lighting brightness and warmth are effortlessly adjusted with a touch sensitive control panel. Manufactured with high grade OSRAM LEDs, impact resistant materials, and IMG Lighting's uncompromising commitment to quality, performance, and reliability ensure that EcoLight is built for years of lasting use.

Highlights

- High-efficiency, ultra-bright LEDs require no more than 13 watts of power.
- Unique touchpad allows for adjustments in brightness and warmth of lights.
- Clear, crisp, bright light is ideal for reading, computer lighting and office tasks.
- Durable design engineered to last for over 50,000 hours of operation. No light bulbs to replace.

Specifications

- 5-Year Warrantee
- Touch sensitive controls
- Lumens: 600 Lumens
- Light Source: Rated for over 50,000 hours
- Weight: 2000 grams / 4.4 pounds
- Dimension: 240mm x 240mm x 544mm
9.5in x 9.5in x 21.5in
- Color Temperature: 3500k - 6000k +/- 500k
- Fixture Efficacy: 70-80 Lm/W +/- 5Lm/W
750lm+/-50lm
- Input to Fixture: 24VDC (12.9 watts max)
